## Seminole Passenger Briefing

- 1 Establish who is PIC
- 2 Positive Exchange
- 3 Watch for traffic

## SAFETY(Passenger) Brief

**Safety Harnesses Operation** They shall be worn at all times

**Airvents and Windows** Location and operation and motion sickness consideration

**Fire considerations** Extinguisher located behind front seats (2 clips secure it), Arm by removing "D" ring, Discharge as directed by PIC

**Exit Door Operations** Handle up, door open. Handle down, door closed. Emergency exit door location and operation. If off airport landing occurs:

Do not exit until the airplane is at a full stop. Exit 45 degrees to the rear. Rear passengers exit first and discuss which door he will they will use. Meet 100 feet behind the airplane.

**Talking** Sterile cockpit procedures observed on takeoff and landing. If I hold my hand up, stop talking.

Your Questions?
